

I would like to request that the FCC not implement any proposal that would change or diminish Indiana's Telephone Privacy law protections. Prior to putting our names on the do not call list, we seldom had an uninterrupted dinner at home, much less time to read to the our Granddaughter. The phone seemed to always ring at the wrong time and no matter how often we requested that they stop calling they did not.

This law is very important to families throughout Indiana, please do not change it.

Thank you,

Brenda Fisher
